PROFILE SUMMARY

Computer Science student with hands-on experience in **full-stack web development** and **DevOps** practices. Skilled in building scalable applications using **Django** and **Spring Boot**, with expertise in implementing **CI/CD pipelines** (**Docker**, **Jenkins**) and monitoring systems (**Prometheus**, **Grafana**). Strong foundation in **data structures**, **algorithms**, and **agile methodologies**. Passionate about solving real-world problems through **clean code** and efficient systems.

EDUCATION

- **Bachelor of Technology in Computer Science and Engineering** 2022-26
K L University, Guntur CGPA: 9.5
- **Intermediate** 2020-22
Sri Chaitanya Educational Institution, Guntur CGPA: 10

TECHNICAL SKILLS AND INTERESTS

Languages: C, Python, JavaScript, HTML5/CSS3

Web Development: React.js, Node.js, Django, Spring Boot

Development Tools: Git, GitHub, VS Code

DevOps & Cloud: Docker, Jenkins, Prometheus, Grafana, CI/CD Pipelines

Cloud/Databases: MySQL, MongoDB

Methodologies: Agile Development, Scrum.

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering. DevOps Practices (Term Paper: "CI/CD Implementation for Django Applications")

Areas of Interest: Full-Stack Web Development, Cloud Computing & DevOps.

Soft Skills: Problem Solving & Critical Thinking, Self-Learning & Adaptability, Team Collaboration & Agile Methodologies, Time Management & Organization, Technical Presentations & Documentation

PERSONAL PROJECTS

- **Student Course Management System (Django, Python)**
A web-based platform for student-faculty enrollment, course management, and communication.
 - Implemented role-based dashboards (Admin/Faculty/Student) with user enrollment, course registration, and faculty-to-student communication for announcements and course materials.
 - Tech Stack: Django, Python, HTML, CSS, JavaScript, SQLite/MySQL
- **Smart City Services Platform - Spring Boot (Java)**
Digital governance solution bridging citizens and municipal authorities through automated service request management
 - Developed a Spring Boot-based smart city platform enabling citizens to submit service requests (sanitation, utilities) with photo uploads, while providing officials with tracking dashboards and admins with resolution analytics, using RESTful APIs for seamless frontend-backend communication.
 - Tech Stack: Spring Boot, Java, JSP, HTML, CSS, MySQL
- **DevOps Implementation: CI/CD Pipeline & Monitoring for Django Application**
End-to-end DevOps implementation for automated deployment and observability.
 - Containerized Django app using Docker (multi-stage builds) and automated CI/CD with Jenkins (GitHub triggers → build → deploy).
 - Configured Prometheus for metrics collection and Grafana for real-time monitoring dashboards.
 - Technology Used : Django, Docker, Jenkins, Prometheus, Grafana

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** May 2024
Amazon Web Services [Verify](#)
- **Certified AI Associate** October 2024
Salesforce [Verify](#)
- **EX183 Red Hat Certified Enterprise Application Developer** December 2024
Red Hat [Verify](#)
